## DETAILED ACTION

### *Claim Objections*

1. Claim 2 is objected to because of the following informalities: Words "inter-later" should read as "interlayer." Appropriate correction is required.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Henley (US5459410A).

Henley discloses in Figs. 11-13 that a method for repairing a defect in a display having pixel region formed on a substrate comprises the step of irradiating a multi-layer region formed by stacking a plurality of conductive layer with insulation layers interposed with a laser beam to selectively remove only an upper conductive layer or plurality of conductive layers in the vicinity of multi-layer region such that neither inter-layer short-circuit nor short-circuit in a single layer occurs in multi-layer region (column 3, lines 23-34 and lines 52-60). Henley also discloses in Figs 11b and 12c that a method for repairing a defect comprises the step of forming a bypass for a broken portion of a gate bus line by separating or connecting gate bus line from or a drain electrode or source electrode of TFT, as shown in Fig. 14, a pixel electrode or storage capacitor bus line (column 2, lines 48-43 and abstract.)

2. Claims 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Johnson (US4752118).

Johnson discloses in Figs. 12-17 that a display having a plurality of bus lines formed in a display area comprises a repair line connectable to a plurality of extraction lines, for repairing lines breakable that has occurred at extraction wiring portion extending between display and respective terminals 140/or 162 for plurality of bus lines 136a/ or 156.

3. Claims 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Salisbury (US5303074A).

Salisbury discloses in Fig. 3 that a display having a plurality of bus lines formed in a display area comprises an auxiliary line or repair line 210/ or 250 formed in a layer under extraction wiring portion for bus lines 230/or 270 with an insulation film 220/or 240 interposed therebetween.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

4. Claims 4 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujikawa et al. (US5995178A).

Fujikawa discloses in Figs. 3 and 4 that a display having a plurality of bus lines formed in a display area comprises an auxiliary line or repair line 41 formed in a layer

above extraction wiring portion 28 for bus lines 16/or 17 with an insulation film 22/or 45 interposed therebetween.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to HOAN C. NGUYEN whose telephone number is (703)306-0472. The examiner can normally be reached on MONDAY-THURSDAY:8:00AM-4:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, SIKES L WILLIAM can be reached on (703)308-4842.
